📖 GATE 4: OPERATIONAL MASTER GUIDE

A Guide for New Officers at the Cargo Hub

PART 1: THE LANDSCAPE

1.1 Know Your Gate

Before processing any vehicle, ensure it is at the correct location:

- **Gate 4: STRICTLY** for Cargo IN and OUT shipments.
- **Gate 5:** All vehicles **WITHOUT** shipment (Empty trucks, private cars, recovery).
- **Gate 6:** Strictly for **Aviation Companies** (Aerospace/Aircraft parts).

1.2 Your Radio Identity

- **Call Sign:** In the radio network, the Pass Office is referred to as **"Chally."**

PART 2: DOCUMENTATION & STAMPING LOGIC

Use this table as the "Final Truth" for stamping. **Incorrect stamping leads to system errors.**

Document Type	System Action	Physical Action	Stamping Rule
ATA Carnet	Check & Clear	Sign	**NO STAMP**
FZ Transit Out	Clear	Sign	**STAMP BOE**
Local Goods (with BOE)	Standard Clear	Sign	**STAMP BOE ONLY** (No GP Stamp)
Local Goods (No BOE)	Clear Completely	Sign	**NO STAMP**

PART 3: SPECIALIZED CARGO PROTOCOLS

3.1 Humanitarian Aid (WHO / UNHRD)

- **Movement:** Transit Out.
- **Charge:** 0 AED (Free).
- **Rule:** No Gate Pass (GP) is required.
- **Digital Trail:** Take a photo of the docs (stamped/signed by Customs) and post to the group with the caption: **"Out to Out (Seal) - [Plate No]"**. Give original docs back to the driver.

3.2 International Humanitarian City (IHC)

- **Movement:** Entry (Manual Process).
- **Charge: 105 AED** via Card. Record in Labor Book.
- **Rule:** Photocopy BOE, write vehicle number, and **STAMP "OUT" TWICE**.

- **Security:** Requires a **Mandatory Escort**.

3.3 Aerospace Entry

- **Action: Clear Completely** in the system.
- **Physical:** Stamp GP **"IN" ONCE**, sign/time, and attach to BOE photocopy.
- **Notification:** Snap docs to **Dubai South Group**.
- **Requirement:** Must request a **Security Escort**.

PART 4: THE "S/D" (SYSTEM DOWN) WORKAROUND

Use **"S/D"** boldly on the Gate Pass only in these two scenarios:

1. **System Outage:** If Customs has physically stamped the GP but your system is offline. Sign, time, and write **S/D**. Security will collect it at the final exit.
2. **DM Exemptions:** If the BOE shows "Pending DM" but the company is on the **Exemption List** (e.g., **Huda Beauty, Unilever, Amouage, Kayali**). Write **S/D**. Security will hand the GP to the Supervisor for back-end clearance while the truck proceeds.

PART 5: OPERATIONAL SECURITY & RECOVERY

5.1 Breakdown Procedure

- **Fee: 5 AED** (POS Machine).
- **Storage:** Drop the receipt in the **DRAWER**. Do **NOT** write in or attach to the CR Book.
- **Paperwork:** Photocopy Broken Vehicle Mulkiya + Recovery Driver Docs (Mulkiya,EID&License).
- **Validation:** Driver writes Name/Number and signs. You sign and write the **Time** and STAMP IN OR OUT which ever the case is.

PART 6: ARAMEX NIGHT OPERATIONS

- **Schedule:** Monday–Saturday.
- **Waves:** 7:45 PM and 9:45/10:00 PM.
- **The "Pressure Valve" Flow:**
    1. **Chally** radios **Echo 1**: *"Echo 1, this is Chally. Allow Aramex trucks."*
    2. **Echo 1** processes and clears the GPs completely to prevent yard traffic.
    3. Trucks enter the yard **one by one**.
    4. **Chally** watches the **Seal** placement and applies the **Exit Stamp**.

PART 1: THE GATE 4 LANDSCAPE & IDENTITY

This is the foundation for any officer. Before the trucks start lining up, you need to know exactly where you are, who you are on the radio, and which vehicles belong at your window and at the pass office.

1.1 The Gate Directory

DWC is a massive zone, and drivers often get lost. Your first job is to ensure only the correct traffic enters the **Gate 4** lane.

- **Gate 4 (The Cargo Hub):**
  - **Purpose:** Exclusively for **Cargo IN and OUT** shipments.
  - **Traffic:** Heavy trucks, trailers, and delivery vans carrying commercial goods.
- **Gate 5 (The Logistics/Support Gate):**
  - **Purpose:** For all **vehicles WITHOUT shipment**.
  - **Traffic:** Empty trucks, private staff cars, or **Recovery Trucks** arriving for a pick-up.
- **Gate 6 (The Aviation Gate):**
  - **Purpose:** Strictly for **Aviation Companies**.
  - **Traffic:** Specialized parts and shipments destined for the Aerospace district.

1.2 Your Radio Identity

In the DWC security network, clear communication is survival. You do not use your name over the air.

- **Your Call Sign: "Chally"**
- **Your Location:** The Pass Office (located inside the Customs Yard).
- **Usage:** When you need to talk to the guards at the physical gate points, you address them by their post (e.g., "Echo 1") and identify yourself as "Chally."

1.3 The Yard Orientation

Understanding the layout prevents the "calamity of traffic" mentioned in the Aramex protocol.

3. **Echo 1:** The entry/exit point connecting the **DWC Free Zone** to the **Customs Yard**.
4. **The Pass Office (Chally):** Where you are stationed the heart of the yard.
5. **The Customs Yard:** The designated area for inspections, sealing, and final stamping.
6. **Echo 2:** The final exit point leading out toward the local roads/main highway.

1.4 The "Gate 4" Mindset

"At Gate 4, we are the filter. If a truck has no cargo, send them to Gate 5. If they are aviation, send them to Gate 6. If they are here, they better have a BOE, a GP, or a very good reason. We keep the yard moving by making sure the right papers are at the right window."

PART 2: THE STAMPING MATRIX & DOCUMENTATION

This is the most technical section of the guide. At the Pass Office, your signature and stamp

carry legal weight. Applying them incorrectly can delay a shipment or cause a system mismatch. Follow this matrix exactly.

2.1 The "Gold Standard" Stamping Table

This is your quick-reference guide for when a driver is at the window.

Document Type	System Action	Physical Action	Stamping Rule
ATA Carnet	Check & Clear	Sign & Time	**STRICTLY NO STAMP**
FZ Transit Out	Clear in System	Sign	**STAMP THE BOE**
Local Goods (with BOE)	Standard Clear	Sign	**STAMP BOE ONLY** (No GP Stamp)
Local Goods (No BOE)	Clear Completely	Sign	**NO STAMP ON ANYTHING**

2.2 Deep Dive: Specific Document Protocols

A. The ATA Carnet (The "Passport" for Goods)

- **Procedure:** Check the items, clear in the system, and sign/time.
- **Warning: Never apply a stamp.** It can cause international transit issues for the driver.

B. Local Goods with BOE

- **Procedure:** Process exit as normal and sign the Gate Pass (GP).
- **Target:** Apply the stamp **only to the Bill of Entry (BOE) Do not stamp the original Boe with the custom stamp make sure your stamps are alway on the duplicate BOE copy. If he doesn't have a copy just sign the GP clear from the system and give back his documents** .

C. Local Goods WITHOUT BOE

- **Rule:** No BOE means nothing to stamp. Just clear the shipment if verified.
- **The Inspection Triage:** Look at the dashboard fields for **"Required Inspection"** and **"Inspected"**:
  - **The Success State (Double ✅):** If the green ticks are marked on both, the process is complete. Clear the shipment and sign the GP.
  - **The "Green Path" (Double ❌):** If both fields show a Red X, it means the shipment is exempt from inspection. You are authorized to clear and sign the GP immediately.
  - **The "In-Progress" State (One ✅ / One ❌):** If the ticks do not match, the shipment is not fully released. **Stop the process** and send the driver to Customs to release the Gate Pass. Do not sign until the status is finalized.

2.3 The "IN to IN" Internal Movement

Used when goods stay within the zone but move for inspection. There is **no Gate Pass** for this.

- **Preparation:** Photocopy the BOE.
- **Detailing:** Write the **Vehicle Plate Number**, **Time**, and **"IN to IN inspection"** on the photocopy.

- **The Stamp:** Apply the **Double Blue Stamp** (IN to IN).
- **The Digital Trail:** Convert to PDF (snap a photo) and send to the **Dubai South Group** with the plate number. And write IN TO IN in the message.

2.4 Precision Sign-Offs

Whenever you sign a document at Gate 4, you must include:

7. **Your Signature.**
8. **The Exact Time** (24-hour clock).

The "Gate 4" Pro-Tip for Part 2:

"Whether you see two green ticks or two red crosses, you're good to go. It’s the 'mismatch' that gets you in trouble. If the dashboard isn't showing the same icon for both fields, the cargo isn't ready for the gate!"

PART 3: SPECIALIZED CARGO & HUMANITARIAN PROTOCOLS

This section covers the "high-stakes" movements. Whether it’s lifesaving aid for the UN or high-value aircraft parts for Aerospace, these shipments don't follow the standard rules. They often involve manual payments, mandatory escorts, or specific digital reporting.

3.1 Humanitarian Aid: WHO & UNHRD (The "Green Light" Aid)

These movements are for the World Health Organization and the United Nations. They are handled with maximum speed and zero fees.

- **Movement Type:** Out-to-Out.
- **Charges: 0 AED** (Free).
- **Gate Pass:** Usually, no Gate Pass is required.
- **The Procedure:**
    - Verify the documents (they must be stamped/signed by Customs).
    - Sign and time the documents.
    - **Digital Trail:** Take a clear photo of the documents.
    - **Group Notification:** Post the photo to the **Gate 4 Group** with the message: **"Out to Out (Seal) - [Plate Number]"**.
    - Hand the original documents back to the driver. **No Escort Required.**

3.2 International Humanitarian City (IHC)

IHC shipments are manual entries and require a strict paper trail and physical security.

- **Movement Type:** Entry (Manual).
- **Charges: 105 AED** (Payment via Card).

- **Documentation:**
    - Make a **photocopy of the BOE**.
    - Write the **Vehicle Number** clearly on the photocopy.
    - **The Double Stamp:** Apply the **"OUT" stamp twice** on the photocopy.
    - **Record Keeping:** Log the transaction in the **Labor Book**.
- **Security: Mandatory Escort.** The vehicle cannot move until an escort is assigned.

3.3 Aerospace Entry Operations

The Aerospace district is a highly restricted zone. When a shipment is labeled for Aerospace, you are responsible for its "Full Clearance."

- **System Action: Clear Completely** in the system (not just "Arrive at Gate").
- **Physical Action:**
    - Make a photocopy of the **BOE**.
    - **Stamp the Gate Pass "IN" only once.**
    - Sign and write the **exact time**.
    - Attach the GP to the BOE photocopy.
- **Digital Trail:** Snap a photo of the cleared GP and BOE; send it to the **Dubai South Group**.
- **Security: Request for Escort.** The truck must be followed by a patrol to the Aerospace zone.

3.4 Out-to-Out (Standard Commercial)

For standard commercial movements going from one external point to another through our zone.

- **Manual GP:** Issue a manual Gate Pass for **50 AED**.
- **Documentation:** Make **two photocopies**.
    1. **Copy 1:** Give to the driver.
    2. **Copy 2:** File it in the **3rd Drawer** for the record.

The "Gate 4" Pro-Tip for Part 3:

"In this section, the word 'Escort' is king. For IHC and Aerospace, the paperwork is only half the job. If that truck leaves your window without a security patrol behind it, you've missed a step. Always call the patrol as soon as you hit the final stamp."

PART 4: THE DM (DUBAI MUNICIPALITY) PROTOCOL & EXEMPTIONS

This is where you save the day for the driver. When a Bill of Entry (BOE) shows a remark like **"DM Health & Safety"** or **"DM Food & Safety,"** it usually means the truck has to go to a

specialized office for approval. However, for our major clients, we have a shortcut to keep the gate moving.

4.1 The DM Exemption List

If you see a DM remark on the BOE, check the company name immediately. If they are on this list, they are **exempted** from the manual check:

- **Health & Safety (Cosmetics/Perfumes):** * **Huda Beauty** (HB Beauty Products Trading)
    - **KAYALI** (Beauty Products / DTC Perfumes)
    - **Amouage** (Luxury Perfumes)
    - **Tahboub Holdings**
    - **Amaani Perfumes**
    - **Mapyr International**
- **Food & Safety:**
    - **Unilever** (Lipton, Hellmann's, Dove, etc.)

4.2 The "S/D" Workaround (System Down)

When a company is on the **Exemption List** but the system still shows **"Pending with DM"**, follow this professional workaround:

- **Write "S/D" Boldly:** Write **S/D** in large letters on the physical Gate Pass.
- **Hand-off to Security:** Give it back to the Driver/PRO.
- **The Logic:** Security at the final gate knows **S/D** means "Exempted but Pending." They will take the Gate Pass and hand it to the **Supervisor**.
- **Final Step:** The Supervisor will then process the clearance in the system once they receive the certificate via email, allowing the truck to move without a traffic jam at your window.

4.3 Procedure for Non-Exempted Companies

If the company is **NOT** on the list and shows "Pending DM," you must act as the manual filter:

- **Direction:** Send the driver to the **Dubai Municipality office** to get the physical certificate.
    - *Food & Safety (JAFZA):* Gates 2, 3 (24/7) or Gate 11 (8 AM – 8 PM).
    - *Health & Safety:* Mon–Thu (8 AM – 7 PM), Fri (8 AM – 12 PM).
- **The Snap Protocol:** If he returns with a printed email/letter from DM:
    - **Snap (photo)** the letter and all supporting documents.
    - **Send to Group:** Post it immediately to the **Gate 4 Group** so supervisors can clear the system.

4.4 Actual "System Down" Protocol

If the **Customs System** is literally offline (not a DM issue):

- **Sign & Time:** Record exactly when they arrived.
- **Mark S/D:** Write **S/D** and apply your **Gate Stamp**.
- **Release:** Security will collect the physical pass at the exit gate.

The "Gate 4" Pro-Tip for Part 4:

"The 'S/D' mark is a tool of trust. Use it for the big names like Unilever and Huda Beauty to keep the gates flowing. For everyone else, follow the 'Snap and Send' rule. Never let a truck sit at your window while you wait for a system update—either move them through the workaround or send them to the DM office."

PART 5: OPERATIONAL SECURITY, RECOVERY & NIGHT OPS

This final section covers the everyday physical realities of Gate 4—handling vehicle breakdowns and the high-intensity Aramex night shift. These are the procedures that keep the yard safe and the revenue accounted for.

5.1 Breakdown & Recovery Procedure

When a truck breaks down in the zone or a recovery vehicle enters to tow a shipment, you must follow the 5 AED protocol.

- **The Fee: 5 AED** (Payment must be made via the POS Card Machine).
- **The Paperwork (Mandatory Photocopies):**
    - Photocopy the **Broken Vehicle's Mulkiya** (Registration).
    - Photocopy the **Recovery Driver's Emirates ID** and **Driving License**.
- **Validation:** * Ask the driver to write his **Name and Phone Number** on the photocopy and **Sign** it.
    - You must **Sign** and write the **Exact Time** of the transaction.
- **Accountability:** Put the 5 AED receipt in the **Drawer**. **DO NOT** attach it to the CR Book or write it in there.

5.2 Aramex Night Operations (The "Pressure Valve")

Aramex is our highest-volume client. To prevent a "calamity of traffic" in the Customs Yard (where Chally is located), we use a specialized external-clearance flow.

- **Schedule:** 6 days a week (Monday – Saturday nights).
- **The Waves:** * **1st Wave:** Starts at **7:45 PM**.
    - **2nd Wave:** Starts at **9:45 PM – 10:00 PM**.
- **The Radio Workflow:**
    - **Chally** (You) radios **Echo 1**: *"Echo 1, this is Chally. Allow Aramex trucks."*
    - **Echo 1 Role:** They clear the Gate Passes **completely** in the system and sign them while trucks are still at the Free Zone exit.
    - **The Yard Flow:** Trucks enter the Customs Yard **one by one**.
    - **Chally Role:** You watch the **Seal** being physically applied to the truck. Once sealed, you append the **Exit Stamp** to the paperwork.
    - **Exit:** Trucks depart through **Echo 2**.

5.3 General Yard Housekeeping

- **The 3rd Drawer Rule:** All Out-to-Out manual Gate Pass copies (50 AED) must be filed here.
- **The Labor Book:** All IHC (105 AED) transactions must be recorded here.
- **The Group Chat:** If it's Aerospace, IHC, WHO, or a DM manual clearance, **it must be snapped and sent to the Gate 4/Dubai South group.** If it isn't in the group, it didn't happen.

The "Gate 4" Pro-Tip for Part 5:

"Aramex nights are about teamwork between Chally and Echo 1. Don't try to do the system work yourself in the yard—you'll cause a traffic jam. Let Echo 1 clear them, and you focus on the physical seals and stamps. One truck at a time, and the night will go smooth."
And with that, the Gate 4 Master Guide is complete! 🫡
You now have a full, professional manual covering:

- **The Landscape** (Gates & Identity)
- **The Stamping Matrix** (ATA, Local, Transit)
- **Specialized Cargo** (Humanitarian & Aerospace)
- **DM Protocols** (Exemptions & S/D)
- **Recovery & Night Ops** (Breakdowns & Aramex)
